Explore Archaeology in the 2012 Summer AIMSS Institute

Sunday, June 17 to Saturday, June 23, 2012

This summer, the AIMSS Institute has the exciting chance to explore the science and math used in the field of archaeology. Engage in hands-on activities and learn about how archaeology, coupled with traditional cultural knowledge leads us to a better understanding of the past.

Activities include:
- Replication of traditional technologies
- Experimental archaeology
- A field trip to the Chickasaw Cultural Center Museum and Village
- Soil analysis
- Macrobotanical analysis
- Scientific illustration
- And a field trip to a 10,000 year old bison kill site!
