HSCI 3453 Science and Civilization in Islam

T,TH 1:30pm-2:45pm, PHSC 402
3 credit hours
Professors Suzanne Moon and Aparna Nair

What roles have science, technology, and medicine played in modern Islamic societies? How have Muslim peoples participated in the production of scientific knowledge? How have they responded to scientific, technological, and medical advances from around the world within the context of faith? Join us as we explore the rich history of science, technology, and medicine in modern Islamic societies from 1350 CE to the present day. **Non-western gen-ed credit.**
